

WORLD IN 2017

CRISIS AND REDEMPTION

The world will see unprecedented crisis all over, starting 2017, including race riots in the US, right wing attacks as well as food riots in Europe, and possibly more wars, but the year will also see the beginning of march to the spiritual Golden Age

BY CRAIG HAMILTON-PARKER

The 'shoot-from-the-hip' astrologer and psychic medium is outspoken and has astonished people with the accuracy of his clairvoyance. He had accurately predicted in 2015 of 'lone wolf' terror attacks in Berlin, Rome and Paris, and also said Britain will thwart such an attack. The reality is now well established. He has worked with the yogis and astrologers in India. His bog is <http://psychics.co.uk>

The last US presidential polls have been the most acrimonious ever, and the resurgence of a very belligerent White labour class was visible throughout. The stars say that United States of America will become politically divided between East and West. The poll results, that has shocked many will lead to gun fights and riots, (Correct 10/10... 10 Nov 2016 Riots) and there will be turmoil throughout 2017. The situation will worsen to an extent that neutral troops from Canada will have to be called in to quell unrest.

On the economic front, the States are

KEY HIGHLIGHTS

- ★ White racism will divide the US and there will be gun fights and riots
- ★ In Europe there will be riots in Rome, Madrid, Berlin, Paris and Prague
- ★ Chinese provocation might lead Japan to enter into an arms race
- ★ Due to such crises, people will turn to welcome the Golden Age in 2050

and great social unrest with violent rioting and great suffering for the poorest in society. I believe that many of the following predictions will happen during 2017, but some of what I am seeing may lie further ahead – possibly within the next two to three years.

For one thing, the US is set for major problems, whether socially, politically or economically. I can say that Hillary Clinton will resign from politics because of the release of documents that reveal her financial corruption and falsification of government documents.

Is the American Dream set to evaporate in 2017? Will Donald Trump triumph and Hillary Clinton eclipse? How will the much touted White resurgence impact the 'greatest nation in the world'? Will Britain survive the BREXIT vote? And what about the seething anger seen almost all over Europe? On the other hand, is there any chance of positivity surfacing in the next year or two?

These are not political calculations, but what the stars tell lay ahead for the world. The year will be one of economic troubles

IN 2017 THERE IS A SERIOUS threat to military confrontation between India and China due to the latter using Pak Occupied Kashmir against India

in for shock. To add to the political woes of Americans, the US will experience a serious drought during the summer of 2017. The August 21, 2017 total solar eclipse over America – something that has not been seen in the country during the last 26 years – will coincide with a huge stock market fall and long-term inflation. And on the international front, there will be conflicts between China and USA as satellite computers are hacked.

EUROPE IN FLAMES

Denmark and Italy will pull out of the EU as the Euro crashes. Year 2017 will see Italy in serious economic problems. Economic chaos in Europe (and America) with riots in many European capitals and big cities, among them Rome, Madrid, Berlin, Paris and Prague. In these places, many people are suffering serious poverty and food shortages due to the failure of the Euro. A famous building will go up in flames as right-wing riots in Germany will spark memories of the burning of the Reichstag. Britain, which had faced a serious split within, however, escapes the worst of the international economic troubles and is seen as a safe economic haven. Britain, India and Australia will form an economic alliance.

OTHER CLIMES

Japan is slated to initiate an arms race in the Far East after provocation from China and North Korea. But North Korean dictator Kim Jong-un will be fall from power later in the year, or may between December 2017 and January 2018.

The vexed issue of Kashmir and Pakistan and China aligning on it against India is already there. In 2017, there serious threat of escalation of conflict between China and India over the northern border of Kashmir. A new war will spill over to Afghanistan as revolution erupts in Uzbekistan.

The alliance between Russia and USA will partition Syria. The country, already ruined due to four years of war, will be a

wasteland.

From December 2017 – possibly into mid-2018 – there will be a worldwide flu-like epidemic from a strange disease that attacks the immune system and will kill many in the third world.

For games buffs, there is some good news. Year 2017 will see the launch of new virtual reality games and cinema. This will be hailed as a great cultural leap forward and will take off on a massive

scale in the coming years. Its downside is that, just like immersive video games, it saps the inspiration from people and further enslaves the mind to materialism.

GOLDEN AGE COMETH

Many of the above predictions are pretty gloomy but I feel that there will be a simultaneous growth in spirituality among the people of the world that will now start to lead us into a Golden Age. Conflict and hardship, added to growing environmental crises across the world, will bring good people together and ignite a desire to seek the true purpose of human life.

I feel that 2017 and 2018 are the years when miraculous spiritual things will be revealed to the world, as it finally breaks the yoke of the Age of Materialism. At first, just a few will witness the revelations of the divine, but eventually, people will experience the world in a completely new way and directly grasp higher consciousness.

Many of the traditional religions, those that are dependent on blind belief, will fail and more people will seek direct experience of the spiritual realms. Many religions will encourage people to seek direct personal experience of spirituality through meditation.

The years ahead will be a tremendous time to be living on earth. Great things are soon to be revealed. By 2050, the world will have entered the Golden Age when higher consciousness and miraculous living are possible. The time will come when people will come to realise that the collective future of the world can be changed for the better by our good thoughts and actions.

(Now lock me up and throw away the key, for I'm sounding like a religious maniac!) 📌
